

# Company

**Company Name:** DrinkForge

**Tagline:** "Pouring Spirits, Forging Futures"

## Overview:

DrinkForge is an innovative platform that seamlessly connects consumers with local distilleries and manufacturers. Imagine ordering your favorite craft cocktail or beer while also sourcing custom-engineered parts for your DIY projects—all delivered right to your door.

## How It Works:

1. **User-Friendly App:** Customers can browse a curated selection of alcoholic beverages from local distilleries alongside a range of customizable manufacturing parts (like 3D-printed components).
2. **Dual Delivery Service:** Once an order is placed, DrinkForge sends local artisans and delivery drivers to fulfill both the beverage and manufacturing parts requests simultaneously.
3. **Crafted & Custom:** Users can customize their drinks (e.g., choosing ingredients for a cocktail) and parts (e.g., specifying dimensions for a bracket).
4. **Subscription Model:** Customers can subscribe to monthly packages featuring limited-edition spirits and DIY kits with components for fun projects.

## Target Market:

DrinkForge caters to millennials and Gen Z consumers who enjoy craft beverages and DIY projects, focusing on those who value convenience and unique experiences.

## Key Features:

- **Local Distillery Partnerships:** Collaborations with artisanal distilleries for exclusive drinks.
- **3D Printing Options:** On-demand 3D printing services for custom parts, with options for various materials.
- **Community Engagement:** Workshops and events for customers to learn about mixology and manufacturing techniques.

**Sustainability Initiatives:**

DrinkForge focuses on eco-friendly practices by using biodegradable packaging and promoting local sourcing to reduce carbon footprints.

**Revenue Model:**

Revenue streams include delivery fees, subscription plans, and partnerships with distilleries and manufacturers for promotional offerings.

**Fun Fact:**

The company's mascot is "BrewBot," a friendly robot that provides drink recipes and DIY tips through the app.

This playful concept merges the worlds of alcohol and manufacturing in a unique way!

## Java Role

**Position Title:** Cloud Java Developer

**Company:** DrinkForge

**Location:** Remote / Flexible

### About Us:

DrinkForge is revolutionizing the way consumers connect with local distilleries and manufacturing. Our innovative platform combines on-demand alcohol delivery with custom manufacturing parts, all at the touch of a button. We are passionate about providing unique experiences while supporting local artisans. Join us as we shape the future of alcohol delivery and manufacturing!

### Position Overview:

We are seeking a talented Cloud Java Developer to join our dynamic engineering team. In this role, you will design, build, and deploy scalable Java applications on cloud platforms (AWS, GCP, or Azure) to support our innovative services. You will work closely with cross-functional teams to enhance our platform's functionality and ensure an exceptional user experience.

### Key Responsibilities:

- Develop and maintain cloud-based Java applications to support DrinkForge's services.
- Collaborate with product managers and designers to gather and analyze requirements for new features.
- Implement microservices architecture and ensure seamless integration with existing systems.
- Optimize application performance and troubleshoot issues to ensure high availability and reliability.
- Stay current with industry trends and cloud technologies to drive continuous improvement and innovation.
- Contribute to technical documentation and share knowledge with team members.

### Qualifications:

- **Required:** Expert proficiency in Java development and cloud computing (AWS, GCP, or Azure).
- **Recommended:** Experience with Spring Boot and microservices architecture.
- Strong understanding of RESTful APIs and cloud-native application design.
- Familiarity with CI/CD practices and tools.
- Excellent problem-solving skills and the ability to work collaboratively in a team environment.
- Passion for building scalable applications and enhancing user experiences.

#### **Preferred Skills:**

- Experience with AWS services (e.g., AWS Lambda, DynamoDB, S3) or equivalent in GCP/Azure.
- Knowledge of containerization (Docker, Kubernetes) is a plus.
- Familiarity with event-driven architecture and messaging systems (e.g., Kafka, RabbitMQ).

#### **Why Join Us?**

- Be part of a forward-thinking company that values innovation and creativity.
- Work in a collaborative environment where your ideas matter.
- Enjoy flexible work arrangements and a supportive team culture.
- Contribute to exciting projects that blend technology with unique customer experiences.

#### **How to Apply:**

If you're ready to take on this challenge and help us shape the future of DrinkForge, send your resume and a brief cover letter to [careers@drinkforge.com]. We can't wait to hear from you!

## Python Role

**Position Title:** Cloud Python Developer

**Company:** DrinkForge

**Location:** Remote / Flexible

### About Us:

DrinkForge is transforming the landscape of on-demand alcohol delivery and custom manufacturing. Our platform connects consumers with local distilleries and manufacturers, providing unique experiences at the touch of a button. We are dedicated to supporting local artisans while delivering exceptional service. Join us in shaping the future of this exciting industry!

### Position Overview:

We are looking for a skilled Cloud Python Developer to join our innovative engineering team. In this role, you will design, develop, and maintain robust Python applications that enhance our platform's functionality and performance. You will collaborate with cross-functional teams to build solutions that deliver outstanding customer experiences.

### Key Responsibilities:

- Develop and maintain cloud-based Python applications to support DrinkForge's services.
- Collaborate with product managers, designers, and other developers to gather requirements and implement features.
- Design and implement microservices to ensure scalability and reliability of the platform.
- Optimize application performance and troubleshoot issues as they arise.
- Stay updated with industry trends and emerging technologies to drive innovation within the team.
- Contribute to technical documentation and mentor junior developers.

### Qualifications:

- **Required:** Advanced proficiency in Python and experience with cloud platforms (AWS, GCP, or Azure).
- **Recommended:** Familiarity with frameworks such as Flask or Django and microservices architecture.

- Strong understanding of RESTful APIs and cloud-native application design.
- Experience with CI/CD practices and tools for automated deployment.
- Excellent problem-solving skills and ability to work collaboratively in a team environment.
- A passion for building scalable applications and enhancing user experiences.

**Preferred Skills:**

- Experience with AWS services (e.g., AWS Lambda, DynamoDB, S3) or equivalent in GCP/Azure.
- Knowledge of containerization technologies (Docker, Kubernetes) is a plus.
- Familiarity with event-driven architecture and messaging systems (e.g., Kafka, RabbitMQ).

**Why Join Us?**

- Be part of a forward-thinking company that values innovation and creativity.
- Work in a collaborative environment where your ideas can flourish.
- Enjoy flexible work arrangements and a supportive team culture.
- Contribute to exciting projects that blend technology with unique customer experiences.

**How to Apply:**

If you're excited to make an impact and help us enhance the DrinkForge platform, please send your resume and a brief cover letter to [careers@drinkforge.com]. We look forward to hearing from you!

## JavaScript Role

**Position Title:** Cloud JavaScript Developer

**Company:** DrinkForge

**Location:** Remote / Flexible

### About Us:

DrinkForge is at the forefront of blending technology with the craft beverage and manufacturing industries. Our platform connects consumers with local distilleries and custom manufacturing services, creating unique experiences delivered right to their doorstep. We are passionate about innovation and supporting local artisans. Join us in reshaping the future of on-demand services!

### Position Overview:

We are seeking a talented Cloud JavaScript Developer to join our dynamic engineering team. In this role, you will design and develop interactive web applications and services that enhance user engagement on our platform. You will work closely with cross-functional teams to create solutions that deliver exceptional customer experiences.

### Key Responsibilities:

- Develop and maintain cloud-based JavaScript applications to support DrinkForge's services.
- Collaborate with product managers and designers to gather requirements and implement features.
- Build responsive and user-friendly interfaces using modern JavaScript frameworks (e.g., React, Angular, or Vue.js).
- Ensure application performance and optimize code for scalability.
- Stay updated with industry trends and best practices in JavaScript development and cloud technologies.
- Contribute to technical documentation and support junior developers.

### Qualifications:

- **Required:** Advanced proficiency in JavaScript and experience with cloud platforms (AWS, GCP, or Azure).
- **Recommended:** Familiarity with modern frameworks (React, Angular, Vue.js) and state management libraries (Redux, Vuex).

- Strong understanding of RESTful APIs and cloud-native application design.
- Experience with CI/CD practices and tools for automated deployment.
- Excellent problem-solving skills and the ability to work collaboratively in a team environment.
- A passion for creating engaging user experiences and scalable applications.

**Preferred Skills:**

- Experience with serverless architectures (e.g., AWS Lambda) and related cloud services.
- Knowledge of containerization (Docker, Kubernetes) is a plus.
- Familiarity with TypeScript and its advantages in large codebases.

**Why Join Us?**

- Be part of an innovative company that values creativity and forward-thinking solutions.
- Work in a collaborative environment where your ideas are valued.
- Enjoy flexible work arrangements and a supportive team culture.
- Contribute to exciting projects that merge technology with unique customer experiences.

**How to Apply:**

If you're ready to make an impact and help us elevate the DrinkForge platform, please send your resume and a brief cover letter to [careers@drinkforge.com]. We can't wait to hear from you!
